Resident Bios

Dr. Caserto:

I graduated from Cornell Vet School in 2007. I'm starting my second year as an Anatomic Path Resident. I chose pathology because I loved the necropsy rotations at school. I did 3 2 week rotations at Cornell and 4 weeks at the Bronx Zoo in NYC. You get to see such a variety of animals in pathology, I never get bored. I also loved the 2 weeks of surgical pathology I did in school. I love the detective work when trying to read a biopsy. KSU wasn't my first choice, but after being here a year I feel very lucky to be here rather than somewhere else. Between the resources and caseload here I think it's one of the better residencies in the country. When I'm done here I will probably work for a diagnostic lab. I want a career that will give me time to spend with my wife and start a family. I don't want to be on call or working 12-16 hours a day.
